Ember Flex Radiant Panel Heaters

Our Ember Flex radiant panel heaters offer an aesthetically pleasing and energy efficient alternative to unattractive, inefficient and potentially dangerous traditional space heaters. Like the sun, these panels use infrared waves to transmit radiant heat to solid objects. And with the integrated frame and white finish, they're not only functional but also beautiful.

These panels are also dual connection, meaning they can be used "as is" to plug into a standard 120 VAC outlet or they can be modified by a licensed electrician to have a hardwired 120 VAC electrical connection.

Additionally, 2 of these lightweight radiant heating panels (IP-EM-FLX-WHT0500-CW and IP-EM-FLX-WHT-0700-CW) can be suspended from the ceiling to radiate heat from directly overhead. These panels also come with everything needed to mount them to the ceiling.

Available Sizes

Product Information

- Connection Method: Plug-in or Hardwired
- Cord Length: 6.25 ft
- Ingress Protection (IPxx) Rating: IP65
- Mounting Orientation: Dual
- Maximum Surface Temperature: 212 F°
- Warranty: 5 years

Electrical

SKU	SIZE	WATTS	AMPS
IP-EM-FLX-WHT-0300-W	12" x 35"	300 W	2.5 A
IP-EM-FLX-WHT-0500-CW	24" x 35"	500 W	4.17 A
IP-EM-FLX-WHT-0700-CW	24" x 47"	700 W	5.83 A
