

Product Description

Available in several different models, heated towel bath racks from WarmlyYours provide a sleek yet functional design, perfect for a variety of home decor styles. These models are able to provide such a high level of performance at such a low cost (often just 15 cents per day) because of the internal heating elements which turn the bars into sources of radiant heat for warming towels and bathrobes. And not only do these electric models warm your bath towels, they can actually dry them in-between uses.

Electrical Connections for Towel Warmers

Choosing the right electrical connection for you is a crucial step in identifying the perfect towel warmer. WarmlyYours offers hardwired (meaning the electrical connection is made at a junction-box inside the wall), plug-in (with 3-prong plug), and dual connection (comes with a plug-in connection but can be modified by an electrician to hardwired) models with each connection-type providing their own unique benefits.

-  **Easy to Install**
No matter which model you select, installation is a breeze.

-  **Fast Shipping & Simple Returns**
With same day shipping nationwide, we're committed to getting your order to you on time. Plus, we don't charge restocking fees for unused products.

-  **Heats Quickly and Evenly**
Quick warm up time with evenly distributed heat for optimal warmth.

-  **Warranty**
Our towel warmers are backed by our manufacturer warranty that guarantees our towel warmers to be free from defects in materials and workmanship. The warranty duration is 5 years for the Tahoe, Rome, Vancouver, and Vida models and 2 years for all other models.

- Hardwired models provide a visually streamlined look without cords or wires.
- Plug-In models offer a very DIY-friendly installation and can be unplugged when not in use.
- Dual connection models provide you with the flexibility to choose the right connection onsite.
